

PIPES

MADE TO ORDER

A range of flush joint and rubber ring joint concrete pipes are available on a made-to-order basis.

- Compliant with standard classes 2, 3 and 4
- Standard pipe diameter sizes include:
300mm / 375mm / 450mm / 525mm / 600mm / 675mm / 750mm / 825mm / 900mm / 1050mm /
1200mm / 1350mm / 1500mm

FLUSH JOINTED PIPES

Internal jointed pipes are used in applications where there is no water pressure, such as in driveways and for general drainage. These pipes are also available with rubber sand bands for extra protection around joints. The effective length of flush jointed pipes is 2.4m.

RUBBER RING JOINTED PIPES

Pipes with an elastomeric seal, ideal for use in drainage and applications where water pressure is present. The effective length of rubber ring jointed pipes is 2.45m.
