

TRADEWASTE

Trade waste refers to all liquid waste that is discharged into the sewer system from commercial, industrial, laboratory or trade activities.

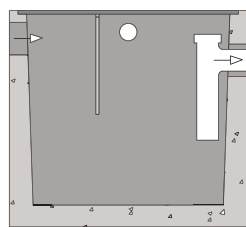

SVC's Tradewaste range is suitable for applications including:

- Cooling and straining, which filters out lint and other materials from the water as well as cooling down the wastewater in a holding tank
- Grease interceptors, which separate grease, oils and solids
- Petrol & oil interceptors, which slow the flow of wastewater and separating liquid and solid contaminants
- Custom pits are also available to order in sizes up to 5000L

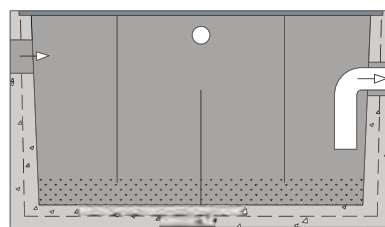

TYPES OF TRADEWASTE PITS

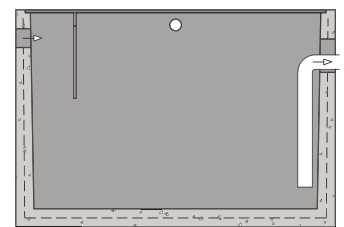

COOLING & STRAINING

GREASE INTERCEPTOR

NEUTRALISING TANK

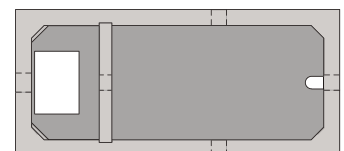

PETROL & OIL

TRADEWASTE PIT BASES

PRODUCT CODE	PRODUCT DESCRIPTION	WEIGHT
TWBCS1100L	TRADEWASTE BASE COOLING & STRAINING 1100L	3800 kg
