

TRENCH CHANNEL SET

EASY-INSTALL STEEL STORMWATER GRATE+CHANNEL

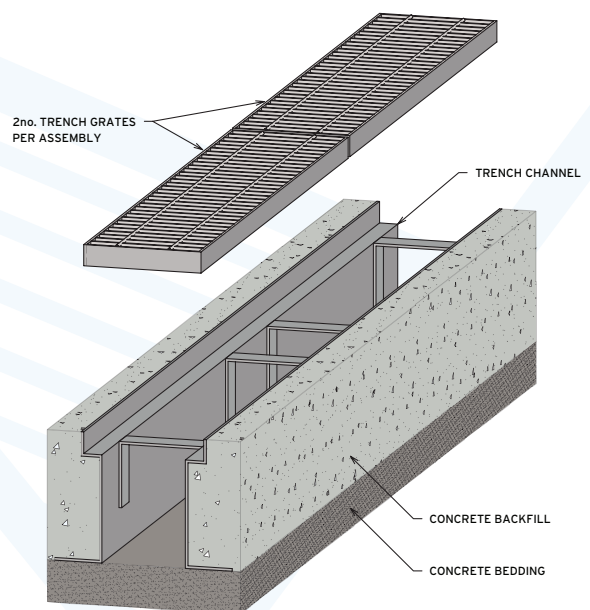

Trench Channel Sets by SVC Civil provide an efficient solution for the installation of linear drainage systems for stormwater.

Available in 3 sizes, the trench channel sets consist of a 2m premium galvanised steel channel with bolt-down steel grates in 1000mm sections, load-rated to Class B as per **AS 3996:2019**. Multiple sets can be connected together to create an extended drain.

PRODUCT CODE	PRODUCT DESCRIPTION	WEIGHT
25.CHAN100B	TRENCH GRATE & CHANNEL SET 100 x 2000mm CLASS B	24 kg
25.CHAN150B	TRENCH GRATE & CHANNEL SET 150 x 2000mm CLASS B	39 kg
25.CHAN200B	TRENCH GRATE & CHANNEL SET 200 x 2000mm CLASS B	41 kg

Dimensions listed above are nominal; product width refers to the width of the internal clear opening.

INSTALLATION GUIDELINES

Trench frames should be installed on a concrete bed, with concrete backfilled on each outer side of the channel.

Grates can then be placed into the frame and bolted down to prevent movement or unauthorised removal.
