

LITTER GUARDS

TO SUIT KERB LINTELS

SVC is a trusted manufacturer and supplier of precast concrete kerb lintels, with several options available to suit VicRoads and Victorian council specifications.

Our suite of standard metropolitan kerb lintels are available to suit barrier-type (B2) and rollover/semi-mountable-type (SM2) kerbing profiles.

To complement our kerb lintel range, SVC has designed **perforated metal litter guards** that prevent floating debris from entering stormwater infrastructure systems and causing blockages. These litter guards are ideal for use in busy retail or commercial precincts, where floating litter is a common issue during rain events.

SVC litter guards are made locally in Melbourne using 3mm galvanised mild steel, with 19mm dia perforations. Available to suit kerb lintel throat openings of **900mm** or **1000mm**.

Easily installed by bolting the litter guards onto the legs of the kerb lintel for a set-and-forget solution

LITTER GUARD OPTIONS

	PRODUCT CODE	PRODUCT DESCRIPTION
	15.700	KERB LINTEL LITTER GUARD 1200MM
