

Environmental & Sustainable Policy

SVC Products Pty Ltd is committed to conducting our business operations in line with the implementation of sustainable processes within the business to reduce our environmental impact.

Top management at SVC Products has defined this policy to ensure its relevance across our operations and will endeavour to support and be responsible for communicating this policy across all operational departments of the business, and to our shareholders and stakeholders.

SVC do this by ensuring:

- That we comply with all applicable environmental laws, regulations, permits.
- That we continue to work in line with this policy, our environmental procedures and monitor our environmental aspects and impacts across the business's operations.
- We continue to identify, develop, and implement controls that are effective in monitoring the release of pollutants to the environment (such as air, water, and soil) from our operations.
- We will continue to ensure through assessment and reporting, that our mechanisms are in place to eliminate or where reasonably practicable, significantly reduce environmental impact and pollution.
- To support and encourage sustainable alternatives within our production and manufacturing processes.
- To communicate our commitment to environmental protection with our employees, customers and interested parties.
- That we continue to identify, plan, and consult on achieving continuous improvement across the business in the best interest of our employees and our Interested Parties.
- We continue to provide resources to re-use, recycle the materials and consumables accumulated through our business practices.

This policy is to be reviewed annually, or in the event of a change to our environmental processes and objectives which may impact this business, or our environment. This ensures that our policy remains relevant to the activities, products, and services of our business.
