

KERB LINTELS

Revision Date: 27 August 2024

Product Description & Applications:

Kerb lintels are used as an inlet for stormwater captured from the road surface to enter the underground drainage network.

Kerb lintels are made to suit either a barrier (B-type) or rollover/semi-mountable (SM-type) kerb profile.

Compliance:

Councils and road authorities may use different variants of kerb lintels within their specifications. SVC offers kerb lintels to suit most council and authority requirements.

Item Availability:

Stocked product – readily available

Product Specifications

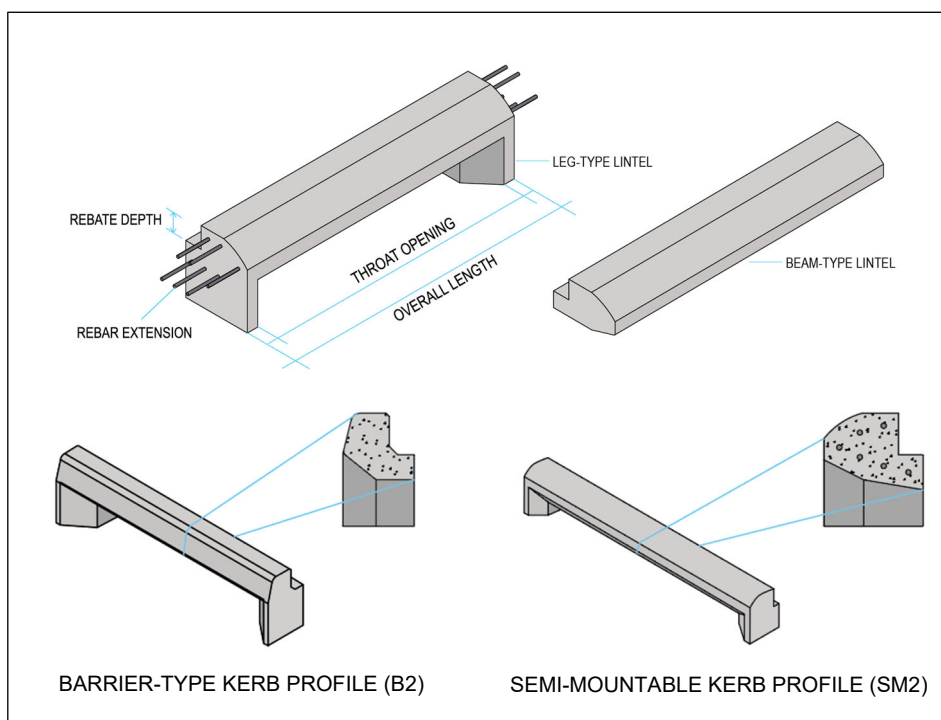

- Material composition: Precast concrete
- Compressive strength: 32MPa - standard
40MPa - VicRoads
- Design life: 50 years

Applicable Standards

- N/A – constructed to council-specific requirements

Recycled/Waste Content

- 10-35% supplementary cementitious material (fly ash & slag)
- Lightweight plastic aggregate (made from processed soft plastic waste) substituting a portion of stone aggregates
- Reclaimed rainwater harvested on-premises
