Civil & Infrastructure | Urban & Landscape Architecture
Total product solutions above & below ground.

COMPANY OVERVIEW

The SVC Group is a leading Australian manufacturer and supplier of high quality precast concrete and ancillary solutions used in Civil Infrastructure and Landscape Architecture. We are unique in our ability to supply complete product packages for infrastructure projects.

Our Civil division supports the development of local and state road, rail and civic infrastructure via the reliable supply of industry-compliant stormwater and drainage solutions.

Our Urban division helps landscape specifiers create memorable public spaces with beautiful, functional and durable architectural concrete elements that enhance the built environment.

Based in Victoria, delivering nation-wide.

OUR VALUES

QUALITY AGILITY PARTNERSHIP EDUCATION INNOVATION

CERTIFICATIONS

SVC is proudly certified against the globally recognised ISO standards for Quality, Environmental & OH&S management.

Our products are manufactured and third-party tested in compliance with the relevant Australian Standards, Codes and governance criteria, ensuring they are fit for application.

LEADERSHIP GROUP

The SVC Group's executive team leads a strong cohort of 100+ locally based employees.

Shane Shepherd
Managing Director

Dale Thompson
Head of Finance & Administration

Clayton Miles
Head of Operations

Bruce Grogan
Head of New Business

SVC Civil works with a broad client base across the public and private sectors, including local and state government, infrastructure alliances, engineers and designers, principal and sub-contractors, commercial and residential builders and developers. We are trusted for our extensive industry experience, technical expertise and dedicated customer support.

Our Civil catalogue range is expansive and maintained at high stock levels, ensuring project fit and speed to site. Products are certified against ISO, Australian Standards and government regulations, providing peace of mind regarding reliable performance and durability.

PRODUCT CUSTOMISATION

SVC Civil offers additional support to customers requiring custom-made solutions at scale. Our fabricating team has the capacity to produce large-format concrete pits, multipart covers and individual components up to 12t in weight.

Custom products are produced following an extensive client consultation process, including design development and shop drawings to ensure all product specifications are catered for.

We have partnered with Tier 1 construction companies, water authorities and government bodies to produce purpose-built precast solutions. As manufacturing is completed entirely off-site, installation time is greatly reduced, driving efficiencies on-site to achieve project delivery timeframes.

INDUSTRY & STANDARDS COMPLIANCE

- AS 3996:2019 - Access covers and grates
- AS 3500.1:1992 - National Plumbing & Drainage Code
- DTP BTN 033 - Structural Requirements for Reinforced Concrete Drainage Pits
- VicTrack 300LA & CAR - Rail loading requirements

EFFICIENT PROJECT MANAGEMENT

SVC has strong project management capability to support large-scale infrastructure projects, with designated teams coordinating complex supply programs from enquiry through to delivery.

Our team manages production planning, logistics, scheduling, and stakeholder communication to ensure high-volume orders are delivered safely, on time, and in line with project specifications.

This structured approach allows SVC Civil to integrate seamlessly with principal contractors and respond efficiently to the demands of major infrastructure projects, assisting with timely completion.

CLIENTS

SVC Civil is a trusted manufacturing and supply partner to a multi-tiered client base, collaborating with stakeholders at all levels to deliver successful outcomes.
